SUMMARY

Full Stack Developer with 1 year of hands-on experience in Python, Django, PostgreSQL, and ERP software development. Specialized in developing and customizing enterprise applications, business workflows, and web-based solutions that improve operational efficiency. Experienced in backend development, database management, API integration, and responsive frontend implementation. Adept at translating business requirements into scalable technical solutions, troubleshooting complex issues, and contributing to the complete software development lifecycle. Passionate about building robust, user-focused applications and continuously enhancing technical expertise in modern web technologies.

INTERNSHIP

Intern | PYTHON FULL STACK DJANGO WITH REACT

05/2024 – 11/2024

One Team Solutions

Ernakulam, Kerala

- Assisted in developing web applications using Django, focusing on backend functionalities.
- Enhanced skills in database management, integrating MySQL for efficient data handling.
- Collaborated with a team to optimize workflows and meet project deadlines.

EDUCATION

Bachelor's Computer Application

06/2021 – 03/2024

Calicut University

SKILLS

Programming Languages

Python, JavaScript, HTML, CSS

Frameworks & Libraries

Django, Django REST Framework, React, Bootstrap, Channels

DevOps

Setting up nginx, Hosting, Gunicorn setup, CI/CD
Jenkins setup

Accounting

Basic Accounting, ERP Accounting

AWARDS AND ACHIEVEMENTS

Generative AI with Google Cloud Workshop

01/12/2022

Python and Django Full Stack Web Developer Bootcamp

01/12/2022

Udemy

PROJECT

Converso - Video Calling Website

Tech Stack: Python, Django, ZEGOCLOUD, Bootstrap, Django channels.

- Built a video calling platform using ZEGOCLOUD, with real-time chat, screen sharing, and participant management.
- Integrated WebSockets for seamless communication and employed responsive design with Bootstrap.

RescueWay Disaster Network

Tech Stack: Python, Django, MySQL, Javascript, HTML/CSS

- Developed a disaster management platform featuring donation event management, user login, and real-time notifications to assist in disaster response efforts.

NEXERAERP

Nexcrest Product

- Maintained and enhanced the Nexera ERP platform by resolving bugs and improving overall system stability and performance.

- Implemented customer-specific customizations and business workflow changes based on client requirements.
- Integrated the Razorpay payment gateway to support secure online payments and transaction processing.
- Developed a subscription management system, enabling recurring billing, plan management, and subscription tracking.
- Implemented a batch-wise inventory management system for efficient stock tracking, batch monitoring, and inventory control.
- Optimized existing ERP modules and database operations to improve application performance and user experience.
- Collaborated with stakeholders to analyze requirements, develop solutions, test features, and deploy updates.
- Participated in the complete software development lifecycle, including development, testing, debugging, and maintenance.

Magnus Care ERP

- Gathered and analyzed business requirements from clients and stakeholders, converting them into technical specifications and development tasks.
- Designed and developed new ERP features based on customer requirements, ensuring alignment with business workflows.
- Implemented Warranty Card and Privilege Card management systems for customer service and membership tracking.
- Developed a Loyalty Points system to improve customer retention and reward management.
- Refactored and enhanced the Accounting Module to improve maintainability, performance, and business process accuracy.
- Implemented Service Transfer functionality to streamline service ownership and transfer processes.
- Modified and optimized Role-Based Access Control (RBAC) and user permissions according to organizational requirements.
- Performed bug fixing, troubleshooting, and performance improvements across multiple ERP modules.
- Collaborated with business users, QA teams, and management throughout the development lifecycle to ensure successful feature delivery.
- Maintained and enhanced existing ERP functionalities while ensuring data integrity and system reliability.

NEXERA ACCOUNTING MODULE

- Developed and enhanced core accounting functionalities within the ERP system.
- Implemented Chart of Accounts (COA) management for structured financial account organization.
- Developed Journal Entry management for recording and tracking financial transactions.
- Built Customer and Supplier Ledger Accounts for receivables and payables management.
- Implemented Profit & Loss (P&L) Reports for financial performance analysis.
- Developed Balance Sheet Reports to provide accurate financial position reporting.
- Created financial reporting features with filtering, grouping, and export capabilities.
- Improved accounting workflows, data accuracy, and report generation performance.
- Performed bug fixes and enhancements to existing accounting modules.
- Collaborated with business users to ensure compliance with accounting and reporting requirements.
